Terms of Participation

The Other Math Club is concerned with exploring mathematics with friends. Topics will frequently depart from standard curriculum material, for example to logic, combinatorics and graph theory. These topics will be introduced at a basic level and we will explore them primarily through Dialogs and Team Projects. There are two additional components to the club structure. Both of these components are optional for the student to explore. First we make a large pool of problems available that relate to our club topics. Second we will make a computing environment available online (details to be announced) that allow students to explore ideas further through the Python programming language. (No advance programming experience is necessary.)

Club dues are $40 for the year and scholarships are available. Make checks out to 'Tyee PTSA'. Please turn in your club dues by December 1 2016. Dues will go towards snacks, materials and if possible a party at the end of the school year.

The student and parents/guardians agree to the general course and intent of the club provided above. The club is experimental and our charted course is subject to modification as it evolves. Any significant changes will be communicated to students and parents/guardians in writing.

While club materials will reference online content (for example Python programs or Khan Academy lessons) it is acknowledged that careful, appropriate use of the internet is the responsibility of the student and her or his parents/guardians.

Other Math Club activities are always a lower priority than schoolwork.

I, _____ hereby agree to participate in the Other Math Club.

_____ student signature _____ date

I, _____ hereby give my consent for the above student to participate.

_____ parent/guardian signature _____ date
